

# stipiti in alluminio

aluminium frames - Aluminiumzargen

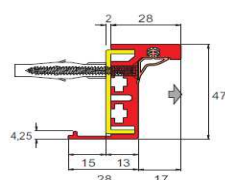

P-O30 / P-O40 / P-O10

La leggerezza dell'alluminio anodizzato si affianca alla sicurezza del cristallo temperato, un profilo che permette la più ampia libertà progettuale con design essenziale e un'ottimale facilità d'installazione. Grazie alla presenza del profilo a muro è possibile ottenere un'escursione degli stipiti in larghezza di  $\pm 7$  mm ed in altezza di  $\pm 3,5$  mm.

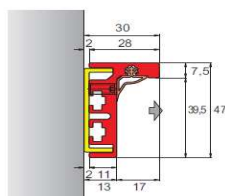

The lightness of anodised aluminium combined with the security of toughened glass, allows maximum planning and design flexibility and ease of installation.

The wall profile allows the doorframe to be adjusted by  $\pm 7$  mm in width and  $\pm 3,5$  mm in height.

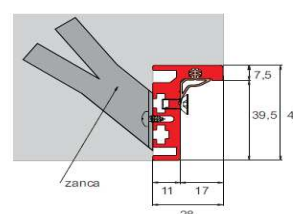

Die Leichtigkeit des eloxierten Aluminium kommt zur Sicherheit des Hartglases hinzu, ein Profil, das weitgehende Planungsfreiheit mit einem wesentlichen Design und optimale Leichtigkeit der Installation bietet. Dank des Wandprofils kann man einen Lauf der Türpfosten in einer Breite von  $\pm 7$  mm und in einer Höhe von  $\pm 3,5$  mm erhalten.

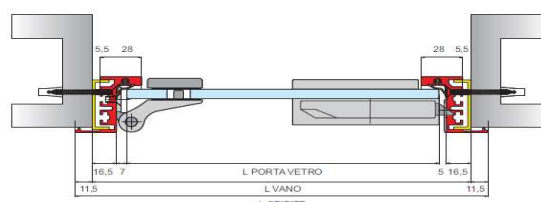

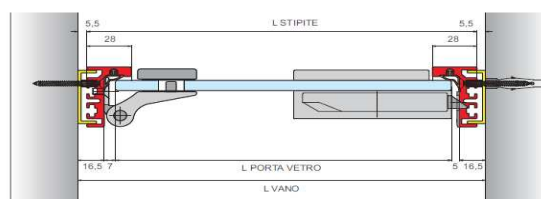

Art. P-040  
Profilo stipite con battuta in alluminio anodizzato.  
Angular built anodised aluminium frame.  
Eck-Anschlagtürzarge aus eloxiertem Aluminium.

Art. P-030  
Profilo stipite in luce in alluminio anodizzato.  
Built anodised aluminium frame.  
Anschlagtürzarge aus eloxiertem Aluminium.

Art. P-035  
Profilo stipite in luce in alluminio anodizzato per applicazione rasomuro.  
Anodised aluminium frame to be built to the wall.  
Anschlagtürzarge aus eloxiertem Aluminium zum Einmauern.

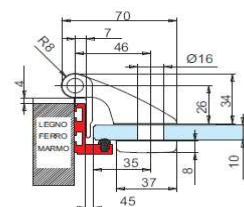

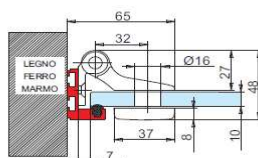

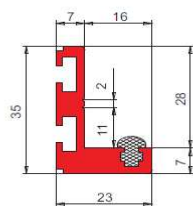

Art. P-010

Profilo stipite in luce in alluminio anodizzato montato a filo muro o interno muro.

Door jamb profile in aluminium anodised for installation inside the wall or line wall.

Rahmenprofil aus oder Aluminium galvanisiertem.
